The **Burger Singh In-Outlet Ordering App** is a mobile-first Progressive Web App (PWA) that lets customers browse the menu, customise items, apply offers, and pay — all from their phone. It reduces queue times, increases average order value, and delivers a premium desi-brand experience at every outlet.

Customers open the app by scanning a QR code at their table or at the counter entrance. No app download needed. Works on any modern smartphone.

"Make every customer feel like a Singh at the counter — bold, in control, and well-fed."

Scope

✓ In Scope

- Dine-In ordering (table QR code)
- Take-Away ordering (counter/door QR)
- Menu browsing & customisation
- Cart management
- Promo codes & offers
- Singh Coins loyalty
- Payment (UPI / Card / Cash)
- In-outlet order tracking

✗ Out of Scope

- Home delivery
- Third-party delivery integrations
- Franchise management dashboards
- Inventory / supply chain
- Staff-facing POS interface

< 3 min

Entry to order placed (avg)

+15%

Average Order Value vs. counter

40%

Orders via app within 6 months

KPI	TARGET
Session-to-Order Rate	≥ 70%
Average Session Duration	2–4 minutes
Cart Abandonment Rate	< 30%
Crash-Free Session Rate	≥ 99.5%
Coupon Redemption Rate	25 per 100 orders
Onboarding Completion	≥ 85%

**The Young Professional**

Age 22–32 · Primary · 2–3x per week

GOAL	Quick lunch, no queue
BEHAVIOUR	Skips onboarding, goes to bestsellers, pays via UPI
PAIN POINT	Slow counter service, wrong orders

**The College Group**

Age 18–24 · Primary · Weekends

GOAL	Explore menu, discover deals, hang out
BEHAVIOUR	Browses all categories, reads descriptions, adds combos
PAIN POINT	Menu FOMO, discounts not visible upfront

**The Family**

Age 30–45 · Secondary · Monthly

GOAL	Easy order for multiple people, clear veg options
BEHAVIOUR	Filters by veg, chooses safe items, picks combos
PAIN POINT	Confusing menus, veg/non-veg not clear at a glance

**The Loyalty Regular**

Age 25–38 · Secondary · Daily/Weekly

GOAL	Earn and redeem Singh Coins, get personalised deals
BEHAVIOUR	Logs in every time, checks balance, uses promo codes
PAIN POINT	Points not visible, rewards feel distant

**Dine-In Journey (Table Order)****Take-Away Journey (Counter Collection)****Order Mode Comparison**

FEATURE	DINE-IN	TAKE-AWAY
Table Number Required	✓ Yes (mandatory)	✗ No
App Discount	10% off (loyalty incentive)	Not applicable
Order Delivery	Brought to table by staff	Collected at counter
Cash Payment	Pay at counter	Pay at counter
Order Token	Shown (for kitchen)	Shown (for collection)

5.1 Onboarding 3 SLIDES

First-time experience introducing the app. Lightweight, skippable, no login required.

SLIDE	CONTENT	PURPOSE
1	"Desi Burgers, Desi Dil" — hero visual	Brand intro
2	"Order. Pay. Eat. No queue."	Value proposition
3	"Earn Singh Coins with every bite!"	Loyalty teaser

- ✓ "Skip" button always visible — bypasses to Home immediately
- ✓ Not shown again on subsequent opens (persisted in localStorage)
- ✓ Guest ordering possible — no sign-up required

5.2 Home Screen DISCOVERY HUB

Sections (top to bottom)

- ① Header: Logo + Mode toggle + Profile icon
- ② Time-sensitive greeting ("Good evening, Singh!")
- ③ Offers carousel (auto-scrolling, 2–4 banners)
- ④ Category pills (scrollable horizontal)
- ⑤ Bestsellers section (6 item cards)
- ⑥ Deals & Combos (2–3 combo cards)
- ⑦ Singh Coins strip (if logged in)

Key Behaviours

- ✓ Offer carousel pauses on user interaction
- ✓ Category pill tap filters menu instantly (no reload)
- ✓ Bestsellers load within 1 second
- ✓ Loyalty strip hidden for guest users

Categories Available

5.3 Menu Screen 30+ ITEMS

Each Item Card Shows

- Name + short description
- Price (with crossed-out original if discounted)
- Rating + review count
- ● Veg / ● Non-veg indicator (FSSAI)
- Calorie count
- Tags: Bestseller · New · Spicy · Healthy
- Add / Customize button

Filters & Search

- ✓ Sticky category tab auto-highlights on scroll
- ✓ Full-text search across names & descriptions
- ✓ Veg-only toggle — real-time filter
- ✓ Sold-out items greyed out
- ✓ Cart badge count updates instantly

5.4 Item Detail Screen CUSTOMISABLE

Full item info + customisation options before adding to cart. Customisable items offer spice level, extra toppings (+₹20–₹60), and ingredient removal. Price updates in real-time as options are selected.

- ✓ Customisation changes update price instantly

✓ Cannot set quantity below 1

✓ Back navigation returns to correct scroll position in menu

5.5 Cart Screen

Content

- Item list with qty controls (–/+)
- Swipe or trash to remove item
- Special instructions (optional text)
- Order mode badge (tappable to change)
- Upsell strip ("Add more to your order")
- Bill summary with all discounts
- "Proceed to Checkout → ₹[total]" button

Bill Summary Structure

Subtotal	₹XXX
GST (5%)	₹XX
 App Discount (Dine-In)	–₹XX
 Coupon Discount	–₹XX
 Singh Coins	–₹XX
Total	₹XXX

5.6 Checkout Screen CRITICAL PATH

A — Order Mode & Table Number

Dine-In: Table number input (required, 1–99). Take-Away: Pickup counter info shown. Mode non-editable here — change from cart.

B — Payment Methods

METHOD	HOW IT WORKS	DEFAULT
 UPI	UPI ID input → deep-links to GPay / PhonePe / Paytm	✓ Yes
 Card	In-app card form (PCI-compliant gateway)	–
 Cash	"Pay at counter before collecting" confirmation note	–

C — Place Order Button

Text: **"Pay ₹[total] & Place Order"**. Disabled if: table number missing (Dine-In) or no payment method selected. On success: animated confirmation → order token screen.

- ✓ Order ID format: BS + 6-digit timestamp (e.g. BS123456)
- ✓ Total floored at ₹0 — never goes negative
- ✓ Only one coupon active at a time

5.7 Order Confirmation & Tracking

- Animated green checkmark on success
- Large token number displayed
- Estimated ready time (~12 min)
- Items summary + total paid
- Singh Coins earned this order
- Status flow: Received → Preparing → Ready

Auto-navigates to Orders after 10 seconds with countdown.

5.8 Singh Coins Loyalty

RULE	DETAIL
Earn Rate	₹10 spent = 1 Singh Coin
1st Order Bonus	+50 coins
Refer a Friend	+100 coins each
Coin Value	1 coin = ₹1 discount
Min to Redeem	50 coins
Max Redemption	20% of order value

Active Coupon Codes

WELCOME10

10% off your order — no minimum spend

Max ₹100 · Min order: ₹0

DESI20

20% off for orders above ₹200

Max ₹150 · Min order: ₹200

SAVE50

Flat ₹50 off on orders above ₹150

Max ₹50 · Min order: ₹150

SINGH15

15% off on orders above ₹300

Max ₹120 · Min order: ₹300

FRIEND100

Flat ₹100 off for large orders

Max ₹100 · Min order: ₹500

Discount Stacking Order

Total Payable

GST is calculated on subtotal before discounts. Total is floored at ₹0.

Edge Cases

SCENARIO	EXPECTED BEHAVIOUR
Coupon makes total negative	Total floored at ₹0
Code entered in lowercase	Auto-converted to uppercase before validation
Cart edited after coupon applied	Coupon re-validated against new subtotal
Min order no longer met after edit	Coupon removed with toast notification
Apply same code twice	No duplicate — "Already applied" message

Buttons	Inter	SemiBold 600	15–17px

Performance

METRIC	TARGET
Initial load (3G)	< 3 seconds
Menu screen render	< 1 second
Add to cart response	< 200ms
JS + CSS bundle size	< 200 KB (gzip)
Lighthouse Performance	≥ 85
Lighthouse Accessibility	≥ 90

Compatibility

PLATFORM	REQUIREMENT
iOS (Safari)	iOS 14+ (iPhone 11+)
Android (Chrome)	Android 9+, 3GB+ RAM
Screen width	360dp – 430dp (mobile-first)
Offline	Cart persists in localStorage
PWA	Installable via "Add to Home Screen"

Accessibility (WCAG 2.1 AA)

- ✓ All touch targets ≥ 44×44 pixels
- ✓ Color contrast ratio ≥ 4.5:1 for all text
- ✓ All images have descriptive alt text
- ✓ Veg/non-veg uses dot + border, not just color (colorblind safe)
- ✓ Screen reader labels on all buttons and inputs

Security

- ✓ No sensitive payment data stored in the app
- ✓ UPI via deep-links only; cards via PCI-compliant gateway
- ✓ HTTPS enforced for all API calls
- ✓ Coupon validation moves server-side before production
- ✓ No PII stored in localStorage for guests

Frontend Stack

LAYER	TECHNOLOGY
Framework	React 19 (Create React App)
Styling	Tailwind CSS 3.4 + Design System tokens
State	React Context API (AppContext)
Routing	Screen-based state machine
Data (MVP)	Static JSON (menuData.js)
Deployment	GitHub Pages (PWA, static)

Screen Flow

```
onboarding → home → menu → item
      ↓
      cart → checkout → orders
      ↓
offers · loyalty · profile
```

Future API Integration

FEATURE	ENDPOINT (PHASE 2)
Menu	GET /api/outlet/:id/menu

LAYER	TECHNOLOGY	FEATURE	ENDPOINT (PHASE 2)
Fonts	Google Fonts: Poppins + Inter	Order Placement	POST /api/orders
		Coupon Validate	POST /api/coupons/validate
		Order Status	GET /api/orders/:id/status

✓ Complete

Phase 1 — MVP

Now Live

- ✓ Onboarding flow (3 slides)
- ✓ Full menu (30+ items, 7 categories)
- ✓ Cart management
- ✓ Order confirmation & history
- ✓ Home screen with offers & categories
- ✓ Item detail with customisation
- ✓ Checkout with coupons & loyalty coins
- ✓ Design system (Burger Singh brand)

→ Next

Phase 2 — Beta Outlet Testing

4–6 Weeks

- QR code generation per table & outlet
- Real-time order status (WebSocket)
- Server-side coupon validation
- Post-order feedback widget (1–5 stars)
- POS / KDS integration (Kitchen Display)
- Backend API for menu, orders, coupons
- Analytics (Mixpanel / GA events)

◦ Planned

Phase 3 — Scale & Personalisation

8–12 Weeks

- OTP login (phone number)
- Personalised "Your Favourites" section
- Hindi language support
- Persistent loyalty across sessions
- Multi-outlet support (outlet selector)
- Full WCAG 2.1 AA compliance audit

◦ Future

Phase 4 — Growth Features

12+ Weeks

- Refer-a-friend with coin rewards
- Custom combo builder
- Apple Pay / Google Pay integration
- Birthday bonus coins (auto-applied)
- Happy hour time-based pricing
- Staff order management dashboard

RISK	LIKELIHOOD	IMPACT	MITIGATION
Low QR scan adoption (older customers)	Medium	High	Staff assistance; QR at eye-level; printed instructions
POS integration delays	High	High	Manual KDS forwarding for MVP; paper token backup
Poor network at outlets	Medium	High	PWA offline caching; cart persists in localStorage
Cart abandonment at checkout	Medium	Medium	Guest checkout default; minimize required fields
Coupon code abuse (public sharing)	Low	Medium	Server-side per-user limits in Phase 2
Device compatibility issues	Low	Medium	Chrome/Safari testing matrix; polyfills for older OS
